SECTION VI. REPRESENTATIONS

(a) There are entered in section IV hereof the following data with respect to the land in farm(s), located in the State and county or counties indicated herein (such county or counties being herein referred to as the "county"), on which each producer whose signature appears in section V of this application carried on farming operations in 1936, and with respect to the farming operations thereon.

(1) The names and addresses of all producers who are entitled to share in the soil-depleting crops (or the proceeds thereof) produced thereon.

(2) The proportionate share in each of such crops, or the proceeds thereof, to which each such producer is entitled under his 1936 lease or operating agreement with respect to such land.

(3) The acreage devoted to each approved soil-building practice carried out in 1936 on such land and the extent to which each such producer carried out each such practice.

(4) The proportion of such land and of the work stock and equipment used thereon in carrying out the 1936 farming operations furnished by each such producer.

(b) The data set forth herein with respect to base acreages, 1936 crop acreages, and the yield or rate for any crop, are correct and complete.

(c) The soil-building practices listed in section IV hereof were carried out in accordance with good farming practice, and no labor, seed, or other material used in carrying out any such soil-building practice was furnished by any State or Federal agency.

(d) No rotation, cropping, or other practice was adopted on such land in 1936 which tended to defeat the purpose of the 1936 Agricultural Conservation Program, and none of the changes in the use of such land involved the destruction of foods, fibers, or feed grains.

(e) No person has for 1936 made any change from the 1935 leasing or cropping arrangements for such land for the purpose of, or which would have the effect of, diverting to such person any payment to which tenants or share-croppers would be entitled if such 1935 leasing or cropping arrangement were in effect for 1936.

(f) Work sheets have been filed in accordance with section 2 of part V of ECR-B-1 Revised with respect to all farms owned or operated in this county by each producer applying for payment hereunder; and there are entered in section III hereof the application code and serial number of each application filed or to be filed with respect to any other farm(s) located in the county in which this application is filed and in respect to which each owner and share-tenant of the farm(s) included hereunder have an interest as owner or share-tenant in the crops (or the proceeds thereof) produced thereon.

(g) The farming operations included herein are not included in any other "application for payment" pursuant to the 1936 Agricultural Conservation Program.

¹ In case of deficiency in the soil-conserving acreage for purposes of diversion, payments will be determined and divided among producers in accordance with section 20 of ECR-B-5.

² The practice numbers for soil-building practices are set forth in section 7 of ECR-B-5.

³ If, because more than four producers are interested in payments under this application, the division of crops, of work stock and equipment furnished, and of soil-building practices is not complete, then Supplement I to Form

(h) No payment has been received or applied for based on the soil-improving practices listed herein.

(i) In accordance with the provisions of the 1936 Agricultural Conservation Program the Secretary of Agriculture is authorized to pay the County Agricultural Conservation Association for the county in which this application is filed, from any amount that otherwise would be payable to me hereunder, my pro rata share of the estimated expenses of said association or such part thereof as may be prescribed by the Secretary.
